NATIONAL INTEROPERABILITY FIELD OPERATIONS GUIDE (NIFOG) VERSION 2.01

The National Interoperability Field Operations Guide (NIFOG) has been updated to version 2.01. New content in 2.01 includes references on Information Technology, Emergency Wireless Carrier Services, Interference Management, Encryption, and Cybersecurity. The NIFOG is a technical reference for emergency communications planning and for radio technicians responsible for radios that will be used in disaster response. The NIFOG includes rules and regulations for use of nationwide and other interoperability channels, tables of frequencies and standard channel names, and other reference material, formatted as a pocket-sized guide for radio technicians to carry with them.

To view and download PDF version, please visit: cisa.gov/safecom/field-operations-guides.

eNIFOG MOBILE APP

The National Interoperable Field Operations Guide (NIFOG) version 2.01 is now available as the eNIFOG mobile app on Apple® iOS™ and Google® Android™ devices. The NIFOG is a technical reference for emergency communications planning and for technicians responsible for radios that will be used in disaster response. It includes rules and regulations for use of nationwide and other interoperability channels, tables of frequencies and standard channel names, and other reference material.

Easy to Use

The eNIFOG app gives users easy access to NIFOG information, offering a content index with shortcuts to reference sections, tables, figures, or images. Navigation links allow users to jump directly to regional quick references as well as bookmark Favorites to develop their own personalized access to critical information for their territory. eNIFOG can be downloaded and then taken to the field as an offline reference, to be used without the need of a cellular or data connection.
